

## REMARKS

This amendment is supplemental to the amendment filed January 21, 2009.

Claims 8-26 are pending in this application. There are 2 independent claims and a total of 19 claims. No fees are due with this amendment.

It should be noted that document code and the description of several of the documents in the amendment filed January 21, 2009 are incorrect and some contain extra copies of the submitted drawings. Seven (7) different documents are identified with the REM document code and with a document description of arguments/remarks. The first entry above or following the EXIN (entered 11-14-2008) is coded REM. This is actually the annotated version of the replacement drawings. It contains the annotated versions of Figures 1, 2, and 4. The next document identified as REM (follows WFEE) is the marked up version of the substitute specification. The next document identified as REM (follows SPEC) contains the arguments /remarks. The next five documents identified in order as REM, REM, DRW, REM, DRW all contain extra copies of the replacement and annotated drawings. The next document identified as SPEC has the instructions for replacing the original specification with the substitute specification.

A replacement sheet for Figure 1 has been included with this amendment. In this drawing “for-trade” is replaced with “for-not-use”. The “for-not-use” is found in the

original Figure 1 just to the right of the diamond titled “program selection”. This change has been made to be consistent with the amended claims 8 and 11.

This amendment corrects typographical errors in the clean and marked up versions of the substitute specification filed in the previous amendment. The previous clean version of the specification included some markings. The substitute specification does not include new matter.

Claims 8 and 11 have been amended to replace “for-trade” with the original language “for-not-use” to be consistent with the original specification. The change in claim 8 is in line 20 and the change in claim 11 is in line 9. The specification has been amended to return to the original “for-not-use” language. This language is also found in original Figure 1. Claim 8 has been amended in line 13 to correct a typographical error, “an” has been replaced with “a”. Claim 11 has been amended in line 12 to remove a repetitive statement. Line 7 of claim 11 incorporates pricing information to each dealpack.

Claims 12 and 18 have been amended to remove an inconsistency in last line of the claim. The term “trading package” has been replaced with “dealpack”. These claims have been amended to correct a typographical error in line 8. Claim 16 has been amended to correct a grammatical error in the first line of the claim.

New claims 22-26 are presented. Claim 22 is similar to claim 8 but does not

Huo

include the gateways. Original claim 5 did not require any gateways. Claim 22 does not include new matter. Claims 23-26 mirror claims 9-12. Claim 22 should be allowed for the same reasons presented in the previous amendment with respect to claim 8.

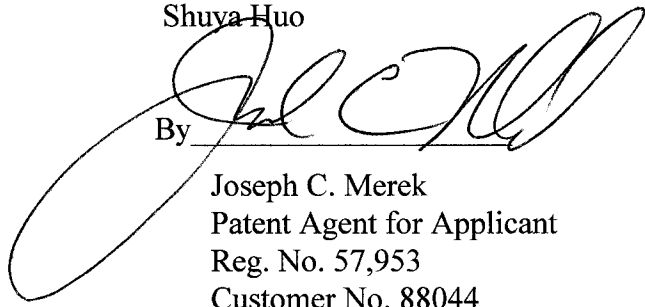

In view of the amendments to the claims noted above, it is respectfully submitted that all pending claims are now allowable and a notice of allowance is solicited.

The Examiner is respectfully requested to call the undersigned prior to issuing a final action to effect changes required to obtain a notice of allowance.

Respectfully submitted,

Shuya Huo
